Deka

Velkommen til Dekas

Dekas er en virksomhed (grundlagt i 2011), der ud over at være underleverandør til en række modeltogsfirmaer rundt om i Europa, også producerer modeller under eget navn.

Design og konstruktion af vores modeller forgår i Danmark, og derfor gjort med detaljerne for øje. Med vores lille team her i Albertslund, og en stabil producent i fjernøsten, sikre vi at et Dekas produkt altid er et Dekas produkt - med ensartet kvalitet.

I dette katalog præsenteres disse egne modeller, som enten er på markedet eller vil komme på markedet inden sommeren 2020. Der er angivet estimeret leveringsterminer ved hver af nyhederne, men følg med på vores Facebook side for daglige opdateringer.

Vi håber at vores produkter falder i Deres smag

Kasper Bang Jensen
indehaver

Welcome to Dekas

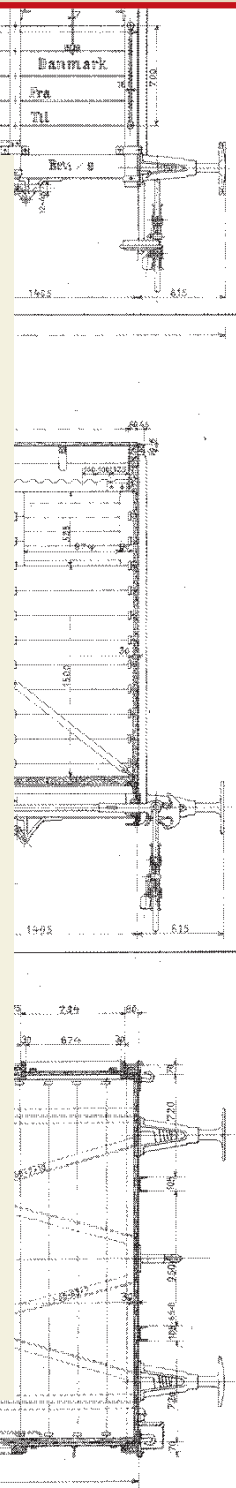

Founded i 2011 Dekas is not only manufacturing for a numbers of European modeltrain brands, we also boast our own range of products to our name.

Design and construction of our models are seated in Denmark, and therefor done with a respect to the prototypes details. With our talented team here in Albertslund (westside of Copenhagen), and a stable manufacture in China, we ensure a stable quality level of our Dekas product - you know what you get.

With this cantalouge we introduce models there are either on the marked, or will be released prior to the summer 2020. At each new item we have marked a estimated delivery time, but please follow our Facebook profile to get the weekly progress update.

We hope you will enjoy our selection of products.

**NEW
TOOLING**

- Chassis in metal (diecast)
- Spring function buffers
- Handrails in metal wires
- Conditioner handles in etched metal
- Spokewheel in metal (0.8mm flange)
- Many separate fitted details in metal and plastic

A technical line drawing of a freight car, viewed from the side. It features a rectangular body with two large doors on the side, each with a handle and locking mechanism. The car is supported by four wheels with visible axles and a central coupling point. The drawing is detailed, showing various mechanical components and structural elements.

A detailed black and white illustration of a steam locomotive engine, showing its boiler, smokestack, wheels, and various mechanical components.

A detailed black and white illustration of a steam locomotive engine, shown from a side profile. The locomotive features a large horizontal boiler, a tall smokestack at the front, and two large, spoked wheels. The engine is positioned on a set of tracks, and the background is plain white.
